

## Button color customizing

Make schema in liquid file of sections :

```
{
  "type" : "color",
  "id" : "go_to_button_text_color",
  "label" : "Text Color",
  "default" : "#000000"
},
{
  "type" : "color",
  "id" : "go_to_button_back_color",
  "label" : "Background Color",
  "default" : "#ffffff"
},
}
```

Put settings in the right place in css of liquid file of sections :

```
#customizablePopUp main .button a {
  flex: 1 1 0%;
  display: block;
  width: 100%;
  height: auto;
  padding: 0px 14px;
  text-align: center;
  line-height: 34px;
  font-size: 15px;
  font-weight: bold;
  overflow: hidden;
  text-decoration: none;
  text-overflow: ellipsis;
  white-space: nowrap;
  border: 1px solid transparent;
  border-radius: 8px;
  cursor: pointer;
  color: {{ block.settings.go_to_button_text_color }};
  background-color: {{ block.settings.go_to_button_back_color }};
```

See if it's working right in settings\_data.json :

```
"customizable-popup": {
  "type": "customizable-popup",
  "blocks": {
    "c7c50af1-25cf-4122-a9bf-8727ddae852b": {
      "type": "image",
      "settings": {
        "popup_image": "shopify:\\\\shop_images\\EN_SEA-popup.jpg",
        "customizable_popup_content_text": "테스트 입니다.\n<br> 줄 바뀌면 세로길이 늘어납니다. ",
        "enable_button": true,
        "go_to_button_text_color": "#191919",
        "go_to_button_back_color": "#ff7092",
        "go_to_button_text": "리뷰 프로모션 공지 자세히 보기",
        "go_to_button_url": "",
        "btn_hide_customizable_popup_text_color": "#ffffff"
      }
    }
  }
}
```
