

Notice chat

Hello, I'm Jihyung Yoo, new intern in Team IT. I have just finished fixing site problems of HAPA TW you uploaded on the board. Attached is the latest site link. Please check it.

<https://www.hapakristin.com.tw/>

1. **Product page** - Price color is now white, and other color options are showing well for gray & beige. Price is added on the cart button.
2. **Secretive Kristin 1 Day** - Sale price and sale icon are showing now.
3. **Secretive Kristin collection** - Pagination is changed to white.
4. **Collection page** - Discounted price will be displayed next time when the products go on sale. Please notify when sale opens. It will be checked again.

Up to now, we haven't encountered any significant problems. If any issues, feel free to let me know.
